

INSULATING TRUCKS, VANS, RVs, AND BUSES

Most refrigerated trucks, trailers, sea containers or vans have polyurethane foam in the walls, ceiling and floors to provide insulation for **temperature control**. Repairs are simplified using FOAM IT GREEN® disposable foam kits. Our kit's portability allows for ease of use without a power source or pressure needed!

The patented dispensing gun is designed for use by anyone - no special training is required. It's so easy that anyone can use it!

Side walls, roofs and floors are easily covered using the Multi-Purpose Mixing Nozzles included with every system, with an optional fan spray nozzle available for wider coverage (3 come free in each kit. To purchase more, see our accessories page.) Because the flow of chemical is controlled by the pull of the trigger, hard to reach areas and tight spots are easily insulated using FOAM IT GREEN®.

Buses and RV's that have **air conditioning** for summer months, and **heat** for the colder climate conditions are easily insulated using FOAM IT GREEN® kits. In addition, it helps **reduce noise** from outside.

Choose our **standard** foam for most applications, and the **Class I** foam for applications in which flammability is an issue.
